

STAFFING REVENUE LAB

THE AI STAFFING REVENUE TOOLKIT

A Practical Client Acquisition, Recruiting & Revenue System
for Staffing Professionals

BUILD A BETTER DESK - NOT JUST MORE ACTIVITY

Find better opportunities. Prioritize the right accounts. Create relevant outreach. Run stronger discovery. Protect job-order economics. Deliver with discipline. Expand successful client relationships.

7-STAGE REVENUE SYSTEM • SCORECARDS • SCRIPTS • AI WORKFLOWS • 30-DAY SPRINT

By Jay Tyler

Recruiting & Business Development for the Age of AI

Welcome to the Toolkit

This is not another list of prompts. It is a working revenue system built from the core methods across Jay Tyler's staffing and recruiting books: signal-based business development, discovery-led selling, high-margin opportunity selection, disciplined recruiting delivery, account expansion, and practical AI use.

THE OPERATING PRINCIPLE

Facts first. Hypotheses second. AI output third. Human judgment always.

What You Get

- The 7-Stage Staffing Revenue System
- Account and market scoring tools
- Signal-based prospecting workflows
- Discovery and objection frameworks
- Job-order profitability and fillability scorecards
- Candidate delivery and offer-risk tools
- Account expansion and client-health systems
- A 30-Day Revenue Sprint
- The companion Staffing Revenue Command Center workbook

How to Use This Product

1. Choose one primary niche or market.
2. Score opportunities before investing time.
3. Use AI to accelerate research, drafting, analysis, and preparation - not to invent facts.
4. Run the system for 30 days and review conversion data weekly.
5. Keep the tools that improve revenue outcomes; remove activity that only creates noise.

COMMERCIAL USE NOTE

You may use the worksheets, scripts, prompts, and templates internally in your own recruiting or staffing business. Redistribution, resale, publication, or repackaging of the toolkit itself is not permitted.

Toolkit Map

Stage	System	Primary Outcome
01	FIND	Market selection + hiring signals
02	PRIORITIZE	Account scoring + target tiers
03	ENGAGE	Email + phone + LinkedIn outreach
04	DIAGNOSE	Discovery + hiring pain
05	CONTROL	Req qualification + fee/process control
06	DELIVER	Intake + candidate presentation + offer risk
07	EXPAND	Account growth + client health
08	MEASURE	Weekly revenue scoreboard
09	IMPLEMENT	30-Day Revenue Sprint
10	REFERENCE	Templates + prompt library + guardrails

COMPANION FILE

Open Staffing_Revenue_Command_Center.xlsx while using this guide. The workbook turns the scorecards and review cadence into an editable operating dashboard.

STAGE 01

FIND

Find profitable markets and real hiring signals

WHY THIS STAGE MATTERS

High-margin recruiting starts with choosing work where urgency, scarcity, business impact, and buyer economics support specialist value.

Operating Rules

- Choose markets where talent scarcity, cost of vacancy, business criticality, and budget authority support meaningful fees.
- Watch for verified signals: hiring spikes, repeated openings, leadership changes, funding, expansion, M&A, new products, major projects, technology changes, and geographic growth.
- Stack signals. A single signal creates a hypothesis; multiple related signals can justify priority.
- Translate each signal into a question - not an unsupported claim about the prospect's pain.

Scorecard / Framework

Factor	Standard / Weight
Talent scarcity	1 = abundant / 5 = scarce
Cost of vacancy	1 = low impact / 5 = material business impact
Budget authority	1 = weak / 5 = clear
Business criticality	1 = peripheral / 5 = critical
Repeat demand	1 = one-off / 5 = recurring
Candidate access	1 = weak / 5 = strong network potential
Differentiation	1 = commodity / 5 = specialist advantage

COPY / PASTE AI WORKFLOW

Act as a staffing market analyst. I specialize in [NICHE] in [GEOGRAPHY].

Using only the verified information below:

1. List the observed hiring/business signals.
2. Explain what each signal may imply.
3. Label each implication HIGH, MEDIUM, or LOW confidence.
4. Create three hiring-friction hypotheses to validate.
5. Give me five discovery questions.
6. Recommend the strongest outreach angle.

Verified information:

[PASTE JOBS, NEWS, LEADERSHIP CHANGES, NOTES, ETC.]

Do not invent facts. Clearly separate observed facts from inference.

STAGE 02

PRIORITIZE

Put recruiter time behind the accounts most likely to create profitable revenue

WHY THIS STAGE MATTERS

A long list is not a strategy. Scoring converts market information into a decision about where to spend scarce recruiter time.

Operating Rules

- Score accounts on fit, signal strength, hiring volume, scarcity, access, fee potential, and expansion potential.
- Use A/B/C tiers so a long prospect list becomes a manageable action list.
- Re-score when the company changes, the market changes, or you learn something new.
- Do not let a famous logo outrank a smaller company with stronger urgency, access, economics, and repeat demand.

Scorecard / Framework

Factor	Standard / Weight
ICP fit	20%
Hiring signal strength	20%
Hiring volume	15%
Role scarcity/difficulty	15%
Decision-maker access	10%
Fee/margin potential	10%
Expansion potential	10%

COPY / PASTE AI WORKFLOW

Score this staffing prospect from 0-100.

Weights:

- ICP fit: 20%
- Hiring signal strength: 20%
- Hiring volume: 15%
- Role scarcity/difficulty: 15%
- Decision-maker access: 10%
- Fee/margin potential: 10%
- Expansion potential: 10%

For every score:

- cite the evidence I provided;
- identify missing information;
- do not invent facts.

Then classify:

- A = 80-100: engage now
- B = 60-79: nurture / investigate
- C = below 60: monitor / low effort

Account information:

[PASTE]

STAGE 03

ENGAGE

Create relevance before asking for a meeting

WHY THIS STAGE MATTERS

Prospects ignore generic agency pitches. Relevance improves when outreach begins with something observable and useful.

Operating Rules

- Lead with a verified signal, specific market observation, or relevant business question.
- Use the signal to form a hypothesis; do not pretend you know the prospect's internal problem.
- Keep first-touch messages short. The purpose is a conversation, not a complete capabilities presentation.
- Use multiple channels, but make each touch add something new rather than repeating 'checking in.'

Scorecard / Framework

Factor	Standard / Weight
Touch 1	Signal + hypothesis + low-friction question
Touch 2	Short follow-up + different angle
Touch 3	Useful market observation or talent insight
Touch 4	Risk, consequence, or relevant example
Touch 5	Professional close-the-loop message

COPY / PASTE AI WORKFLOW

Write a five-touch staffing business-development sequence for [PERSONA] at [COMPANY].

Use only the verified signals and proof below. Each touch must:

- stay under 110 words;
- sound like a recruiter/market specialist, not a generic salesperson;
- add a new reason to respond;
- frame unverified pain as a question;
- avoid hype and fake personalization;
- end with a low-friction next step.

Verified signals:

[PASTE]

Our relevant specialization/proof:

[PASTE]

Create:

1. Insight email
2. Follow-up
3. Market-data/value touch
4. Risk/case-example touch
5. Close-the-loop message

STAGE 04

DIAGNOSE

Turn sales conversations into useful hiring diagnostics

WHY THIS STAGE MATTERS

Discovery creates the context needed to position value, qualify the opportunity, and avoid premature pitching.

Operating Rules

- Use discovery to understand the environment before discussing your service.
- Move through Context -> Challenge -> Consequence -> Constraints -> Commitment.
- Listen for the business impact of delay, not merely the existence of an open requisition.
- Do not rush to solve the problem before the client has articulated and validated it.

Scorecard / Framework

Factor	Standard / Weight
Context	What triggered the hiring need now?
Challenge	What has made the role/process difficult?
Consequence	What happens if nothing changes?
Constraints	What limits the solution?
Commitment	What process and next step can both sides support?

COPY / PASTE AI WORKFLOW

Prepare a 30-minute discovery plan for this staffing prospect.

Organize the questions under:

CONTEXT

CHALLENGE

CONSEQUENCE

CONSTRAINTS

COMMITMENT

Also provide:

- three hypotheses to validate;
- three market insights I could share only if relevant;
- warning signs that the opportunity is weak;
- a two-minute close recommending the logical next step without pressure.

Prospect/account notes:

[PASTE]

STAGE 05

CONTROL

Qualify the search and protect recruiter capacity, fees, and process

WHY THIS STAGE MATTERS

Bad requisitions consume the same hours as good ones. Process and economic discipline protect margin and delivery quality.

Operating Rules

- Separate true must-haves from preferences before sourcing.
- Confirm compensation, urgency, interview steps, feedback timing, decision authority, competition, and hiring-manager access.
- Score fillability and economics before treating a requisition as a priority.
- Where appropriate, position a focused exclusive launch as a way to improve calibration, feedback, and candidate experience - not as a favor to the agency.

Scorecard / Framework

Factor	Standard / Weight
Urgency	1-5
Compensation realism	1-5
Requirement clarity	1-5
Candidate availability	1-5
Manager access	1-5
Interview speed	1-5
Client commitment	1-5
Competition control	1-5
Fee quality	1-5
Expansion potential	1-5

COPY / PASTE AI WORKFLOW

Evaluate this job order as a business opportunity.

Score 1-5 on:
urgency, compensation realism, requirement clarity, candidate availability,
manager access, interview speed, client commitment, competition control,
fee quality, expansion potential.

Then:

1. Calculate total / 50.
2. GREEN = 40-50, YELLOW = 30-39, RED = below 30.
3. Explain the three biggest risks.
4. Identify what information is missing.
5. Give me the exact questions to ask before accepting or prioritizing the search.

Job order:

[PASTE]

STAGE 06

DELIVER

Use AI to accelerate recruiting work without weakening judgment or candidate trust

WHY THIS STAGE MATTERS

AI can remove administrative friction, but candidate truth, judgment, trust, and sensitive decisions remain human responsibilities.

Operating Rules

- Turn intake into a hiring blueprint before sourcing.
- Use AI to expand search logic, organize notes, compare verified experience, prepare interviews, and improve candidate communication.
- Never allow AI to invent candidate qualifications or smooth over material gaps.
- Track offer risk before the final stage: compensation, logistics, motivation, competing processes, counteroffer exposure, and decision criteria.

Scorecard / Framework

Factor	Standard / Weight
Must-have fit	Verified evidence only
Relevant accomplishments	Specific, attributable examples
Gaps/questions	What the interview must validate
Motivation	Only if confirmed
Availability	Only if confirmed
Compensation	Only if provided/appropriate
Offer risk	Known competing factors
Interview focus	2-3 targeted areas

COPY / PASTE AI WORKFLOW

Using the job blueprint and candidate information below, create a concise client-ready candidate brief.

Include:

- three-line summary;
- verified must-have alignment;
- relevant accomplishments;
- gaps/questions;
- motivation only if known;
- availability only if known;
- compensation only if provided and appropriate;
- offer-risk flags;
- suggested interview focus.

Never infer or invent experience.

Job blueprint:

[PASTE]

Resume / recruiter notes:

[PASTE]

STAGE 07

EXPAND

Convert successful delivery into account growth and retention

WHY THIS STAGE MATTERS

Existing clients already know your delivery. Structured expansion can be more efficient than constantly replacing revenue with net-new logos.

Operating Rules

- Treat a placement as the beginning of the next business-development cycle.
- Map adjacent departments, locations, job families, hiring managers, and recurring skill needs.
- Use structured post-placement reviews to create value even when no requisition is open.
- Track client-health signals so revenue risk becomes visible before the account disappears.

Scorecard / Framework

Factor	Standard / Weight
Hiring activity	Is demand active or increasing?
Responsiveness	Are feedback and communication healthy?
Req quality	Are searches realistic and workable?
Fee/margin	Are economics healthy?
Relationship access	Do you have real decision-maker relationships?
Expansion potential	Are there adjacent needs?
Risk flags	What could cause churn or margin erosion?

COPY / PASTE AI WORKFLOW

Act as an account-growth strategist.

Review the client history below and identify five plausible expansion opportunities.

For each:

- show the evidence;
- state what still must be validated;
- identify the likely stakeholder;
- provide one discovery question.

Also:

- identify retention risks;
- recommend a 30-day account plan;
- do not present assumptions as facts.

Client history:

Conversation & Outreach Toolkit

Use these as starting structures. Replace bracketed text with real context and edit until the message sounds like you.

Signal-Based Cold Email

TEMPLATE

Subject: [specific hiring / business signal]

Hi [Name],

I noticed [verified signal]. In [market/niche], that can create pressure around [plausible issue].

We're seeing [brief, supportable market observation]. I don't know if that is showing up for your team, but if it is, I can share what we're seeing around [candidate availability / compensation / process].

Worth a short comparison of notes?

[Name]

LinkedIn Connection Note

TEMPLATE

Hi [Name] - noticed [specific signal/change] at [Company]. I work closely with [niche/role family] talent and follow this market pretty closely. Thought it made sense to connect.

Market-Insight Follow-Up

TEMPLATE

Hi [Name],

One useful data point since my last note: [market observation].

If [initiative/hiring signal] is still active, the issue I'd validate early is [risk]. Happy to send a quick market snapshot if useful.

[Name]

Discovery Opening

TEMPLATE

Before we talk about recruiting services, I'd like to understand what triggered the need, what you've already tried, and where the process is getting stuck. Then I can tell you whether I think we can actually improve the outcome.

Fee Pushback

TEMPLATE

I understand. Before I change the economics, can I make sure I understand the concern? Is it primarily the budget, a comparison with another supplier, or uncertainty about whether this search warrants the fee?

Already Have Vendors

TEMPLATE

That makes sense. Most teams I speak with already have recruiting resources. Where do those resources tend to work well, and what types of roles still create the most difficulty?

Internal TA

TEMPLATE

I wouldn't want to replace a process that's working. Where does the internal team typically need outside help - specialty roles, hiring spikes, geography, speed, or candidate access?

Focused Exclusive Launch

TEMPLATE

Based on what we discussed, I recommend a focused [10-14]-day exclusive launch. That gives us one calibrated message to the market, fast feedback, and enough control to adjust before candidate overlap becomes a problem. At the end of the window, we review results together and decide the next step.

Candidate Submission

TEMPLATE

[Candidate Name] - [Role]

Why I recommend an interview:

- [Verified alignment #1]
- [Verified alignment #2]
- [Verified alignment #3]

Motivation: [only if known]

Availability: [only if known]

Compensation: [only if appropriate and known]

Questions / areas to validate: [gaps]

Suggested interview focus: [2-3 areas]

Post-Placement Expansion

TEMPLATE

Hi [Name],

I wanted to check in on [placement] and make sure the transition is going the way you expected.

Now that we've seen the hiring process from the inside, I also noticed [adjacent need / recurring skill / department]. Is that something the team expects to address this quarter, or is the priority elsewhere?

[Name]

Dormant Client Reactivation

TEMPLATE

Hi [Name],

It's been a while since we worked together. I was reviewing what has changed in [market/skill area] and thought of your team because [specific relevant context].

We're seeing [brief market observation]. Has your hiring mix changed much since [time/event]?

Happy to compare notes even if there isn't an immediate search.

Client Discovery Worksheet

The objective is diagnosis, not interrogation. Use the questions that fit the conversation.

Area	Question	Notes
CONTEXT	What triggered this need now?	
CONTEXT	Growth, replacement, project demand, turnover, or capability gap?	
CONTEXT	What changed in the business?	
CHALLENGE	What has made this difficult so far?	
CHALLENGE	Where are candidates or internal processes breaking down?	
CHALLENGE	What did previous recruiting attempts miss?	
CONSEQUENCE	What happens if this stays open another 60-90 days?	
CONSEQUENCE	Which customer, project, team, revenue, or risk outcome is affected?	
CONSTRAINTS	Which requirements are truly non-negotiable?	
CONSTRAINTS	Where is there flexibility on compensation, location, level, or background?	
PROCESS	Who approves interviews and offers?	
PROCESS	How quickly can feedback be returned?	
COMMITMENT	How many other firms are working the search?	
COMMITMENT	What would a successful recruiting partnership need to look like?	
NEXT STEP	What specific action happens next, by whom, and by when?	

Job Order Profitability & Fillability Worksheet

Score each category 1-5. A high score does not guarantee a fill; it indicates a healthier combination of urgency, market reality, access, process, and economics.

Factor	Question	Score 1-5
Urgency	Is there a real business-backed deadline?	
Compensation realism	Does the range match the target talent market?	
Requirement clarity	Are must-haves separated from preferences?	
Candidate availability	Is there an addressable talent pool?	
Manager access	Can you calibrate directly with the decision maker?	
Interview speed	Can the client move while candidates are available?	
Client commitment	Will the client engage and provide feedback?	
Competition control	Is vendor saturation manageable?	
Fee quality	Do economics justify the delivery effort?	
Expansion potential	Could success create repeat business?	

SCORING

40-50 = GREEN: prioritize. 30-39 = YELLOW: fix weaknesses before heavy sourcing. Below 30 = RED: renegotiate the conditions or decline/deprioritize.

Search Acceptance Questions

- What is the business reason this person must be hired?
- What are the three true must-haves?
- What can flex if the market does not support the original profile?
- What compensation has actually been approved?
- Who will interview and who makes the final decision?
- What is the expected feedback time after a submission/interview?
- How many internal/external sources are working the role?
- What caused previous candidates or searches to fail?
- What would make the client change or pause the search?

Candidate Delivery & Offer-Risk Toolkit

Candidate Brief Standard

Section	What Goes Here
Summary	Three concise lines explaining verified fit.
Must-have alignment	Evidence tied to the actual job requirements.
Relevant accomplishments	Specific examples the candidate can substantiate.
Gaps / questions	What still needs validation.
Motivation	Why the candidate is considering a move - only if confirmed.
Availability	Interview/start timing - only if confirmed.
Compensation	Only when known, appropriate, and permitted by your process.
Offer risk	Competing processes, counteroffer risk, logistics, decision factors.
Interview focus	2-3 areas the client should explore.

Offer-Risk Check

- What would make you accept this opportunity?
- What would make you decline it?
- What other interview processes are active?
- Has compensation changed since we first spoke?
- Are location, schedule, travel, and start-date expectations still workable?
- How would you respond to a counteroffer?
- Who else influences the decision?
- What information do you still need before you could say yes?

HUMAN-LED MOMENT

Use AI to organize and prepare. Keep sensitive candidate conversations, final qualification judgments, compensation nuance, offer acceptance, and trust-critical communication human-led.

Account Expansion & Client Health

Expansion Map

Area	Questions to Ask
Department	What adjacent teams hire similar or complementary talent?
Location	Are other sites experiencing the same hiring pressure?
Job family	What roles sit upstream/downstream from the successful placement?
Manager network	Who else owns similar hiring outcomes?
Project / initiative	What future work could create demand?
Service line	Is there contract, contract-to-hire, direct hire, project, or executive-search potential?

Client Health Score

Factor	1 = Weak	5 = Strong
Hiring activity	No meaningful demand	Active/repeat demand
Responsiveness	Slow/unreliable	Fast/consistent
Req quality	Unrealistic/unclear	Clear/fillable
Fee/margin	Constant pressure	Healthy economics
Relationship access	Vendor-only access	Decision-maker access
Expansion potential	No adjacent opportunity	Multiple credible paths
EARLY WARNING SIGNS		
Slower feedback, lower-quality requisitions, new procurement pressure, reduced manager access, unexplained pauses, repeated fee challenges, leadership changes, or declining hiring activity should trigger a client review.		

Weekly Revenue Scoreboard

Metric	Formula	What It Tells You
BD response rate	Replies / outbound contacts	Target/message relevance
Conversation rate	Qualified conversations / outbound contacts	Whether outreach creates dialogue
Discovery-to-job-order	New job orders / discovery calls	Commercial conversion
Controlled-search rate	Controlled or exclusive searches / new searches	Process leverage
Submission-to-interview	Interviews / submissions	Intake and submission quality
Interview-to-offer	Offers / interviews	Calibration and client process
Offer acceptance	Accepted offers / offers	Alignment and risk management
Fill rate	Filled reqs / closed reqs	Opportunity quality + execution
Expansion rate	Accounts with added business / active accounts	Account development
Revenue per active account	Revenue / active accounts	Account quality

Friday Revenue Review

- Which five accounts deserve the most attention next week?
- Which opportunities advanced? Which stalled, and at what stage?
- Which requisitions are consuming time without enough probability or margin?
- Where is candidate conversion breaking?
- Which client has earned an expansion conversation?
- Which account is showing risk?
- What one workflow should AI accelerate next week?
- What work should stop because it is producing activity without revenue movement?

30-Day Staffing Revenue Sprint

Day	Focus	Action
1	Choose the niche	Score 2-3 possible niches; select one primary market.
2	Define the ICP	Write measurable company, hiring, geography, and role criteria.
3	Build 25 accounts	Create the first focused target list.
4	Capture signals	Record verified hiring/business signals.
5	Score accounts	Identify A/B/C tiers.
6	Build proof	Document relevant outcomes and market observations you can substantiate.
7	Review Week 1	Remove weak targets and tighten the niche.
8	Create account briefs	Build two-minute briefs for the top 10 accounts.
9	Write persona messaging	Create hiring-manager and HR/TA versions.
10	Launch first touches	Start with the highest-scoring accounts.
11	Call with hypotheses	Use one signal and one diagnostic question.
12	Add LinkedIn	Connect with context, not a pitch.
13	Review replies	Classify intent and objections.
14	Review Week 2	Measure response and conversation rate.
15	Build discovery	Prepare Context-Challenge-Consequence-Constraints-Commitment.

30-Day Staffing Revenue Sprint - Days 16-30

Day	Focus	Action
16	Prepare insights	Create supportable compensation/talent/process observations.
17	Practice objections	Vendor, fee, internal TA, timing.
18	Install req scorecard	Set Green/Yellow/Red thresholds.
19	Define search rules	Set minimum access, feedback, compensation, and process standards.
20	Create exclusive option	Define a focused launch and review point.
21	Review Week 3	Find where deals stall.
22	Standardize intake	Turn every req into a hiring blueprint.
23	Standardize screening	Create role-specific screen and offer-risk questions.
24	Standardize submissions	Use concise verified candidate briefs.
25	Set feedback SLA	Agree on timing and format.
26	Run offer-risk checks	Reconfirm decision factors before offer.
27	Map expansion	Identify adjacent opportunities after delivery.
28	Review client health	Score active accounts and churn risk.
29	Run revenue review	Analyze pipeline, conversion, fillability, and expected fees.
30	Lock the cadence	Choose daily priorities and a weekly review time; repeat.

Master AI Workflow Library

Turn a Job Posting Into a Business Hypothesis

COPY / PASTE AI WORKFLOW

Analyze this job posting as a staffing business-development signal. Separate facts from inference. Identify likely hiring drivers, possible business consequences of delay, unknowns, and five questions a recruiter should ask before offering a solution. Posting: [PASTE]

Create a Hiring-Manager Brief

COPY / PASTE AI WORKFLOW

Using the verified information below, prepare a one-page pre-call brief: company context, observed hiring signals, likely stakeholder priorities, three hypotheses, five discovery questions, and two relevant market insights. Mark every inference clearly. [PASTE]

Rewrite Generic Outreach

COPY / PASTE AI WORKFLOW

Rewrite this staffing outreach so it is concise, specific, consultative, and based only on the verified context provided. Remove generic claims, hype, fake personalization, and unsupported pain statements. Keep under 100 words. Draft: [PASTE]. Context: [PASTE].

Turn Discovery Notes Into a Deal Brief

COPY / PASTE AI WORKFLOW

Organize these discovery notes into: business context, hiring challenge, consequence, constraints, decision process, commercial opportunity, risks, missing information, and agreed next steps. Preserve the client's wording where useful. Do not invent details. Notes: [PASTE].

Build an Intake Blueprint

COPY / PASTE AI WORKFLOW

Convert these intake notes into a recruiting blueprint: business reason for hire, outcomes expected, must-haves, preferences, compensation, location/schedule, target backgrounds, exclusions, interview process, decision makers, timeline, selling points, known risks, and open questions. Notes: [PASTE].

Create a Sourcing Strategy

COPY / PASTE AI WORKFLOW

Using this verified hiring blueprint, create a sourcing plan with target titles, adjacent titles, skill synonyms, target industries/companies, likely candidate objections, outreach themes, and Boolean/search concepts. Do not lower or invent requirements. Blueprint: [PASTE].

Candidate Screen Builder

COPY / PASTE AI WORKFLOW

Create a structured recruiter screen from this job blueprint. Include must-have verification, accomplishment questions, motivation, logistics, compensation where appropriate, competing processes, counteroffer risk, and candidate questions. Blueprint: [PASTE].

Post-Interview Debrief

COPY / PASTE AI WORKFLOW

Turn these interview notes into a neutral debrief: evidence of fit, concerns, unanswered questions, candidate interest, client signals, offer risks, and recommended next action. Do not turn opinions into facts. Notes: [PASTE].

Client Expansion Review

COPY / PASTE AI WORKFLOW

Analyze this client's placements, open roles, contacts, and recent activity. Identify evidence-based expansion hypotheses by department, role family, location, project, and service line. For each, give a validation question and recommended stakeholder. Data: [PASTE].

Weekly Desk Review

COPY / PASTE AI WORKFLOW

Act as a recruiting business operating coach. Review the metrics and pipeline below. Identify: the three highest-leverage actions, the biggest conversion bottleneck, low-probability work to deprioritize, one client-expansion opportunity, one process experiment for next week, and the metric that will tell us if it worked. Data: [PASTE].

AI Guardrails & Quality Control

- Never invent candidate experience, education, certifications, compensation, availability, client facts, market data, or proof points.
- Separate facts from inference. Use 'may,' 'often,' 'appears,' or 'a hypothesis to validate' when evidence is incomplete.
- Do not paste confidential, regulated, or personally sensitive information into AI tools unless your firm's policies and the tool's terms permit it.
- Human-review all external messages before sending. High-volume automation can damage sender reputation, trust, and brand quality.
- Do not use AI as the final decision maker for employment decisions. Use it to organize information and support consistent human review.
- Keep fee negotiations, sensitive candidate conversations, offer acceptance, and relationship-critical communication human-led.
- Measure outcomes. If AI creates more activity but weaker conversations or lower conversion, redesign the workflow.

Method & Source Note

The core methodology in this toolkit is adapted and consolidated from Jay Tyler's books covering AI-powered staffing business development, recruiting sales systems, high-margin recruiting, discovery-led business development, technical recruiting, interviewing, and the AI Revenue Engine. The toolkit converts those concepts into operational scorecards, worksheets, scripts, prompts, and review cadences rather than reproducing the books.

External industry context used in the product positioning: Bullhorn, 2026 Recruitment Industry Trends Report. The report provides industry-level observations; it is not a guarantee of individual business results.

Source: <https://www.bullhorn.com/grid/2026-industry-trends/report/>

RESULTS DISCLAIMER

Results vary based on market conditions, specialization, execution, client mix, data quality, pricing, recruiter skill, and other factors. This toolkit is educational and operational guidance, not a promise of revenue or placement outcomes.
