

Welcome to the AI Staffing Revenue Toolkit

Thank you for your purchase. This package is designed to help you move from isolated AI prompts to a practical, repeatable staffing revenue system.

START HERE
1. Read the Toolkit. Start with the PDF to understand the seven-stage FIND → PRIORITIZE → ENGAGE → DIAGNOSE → CONTROL → DELIVER → EXPAND system.
2. Open the Revenue Command Center. Use the Excel workbook to score accounts, track hiring signals, manage your BD pipeline, evaluate job orders, track candidates and monitor weekly revenue metrics.
3. Run the 30-Day Revenue Sprint. Use the implementation plan in the Toolkit and workbook to put the system into operation.

What's in Your Download

01 - AI Staffing Revenue Toolkit.pdf	Your primary playbook. Read this first for the complete operating system, workflows, scorecards and 30-Day Revenue Sprint.
02 - Staffing Revenue Command Center.xlsx	Your working dashboard for account scoring, hiring signals, BD pipeline, requisitions, candidates, client health and weekly metrics.
03 - Editable AI Staffing Revenue Toolkit.docx	An editable Word version for internal customization, notes and adaptation to your staffing business.

A Simple First-Week Plan

Day 1: Review the seven-stage system and define your target market. **Day 2:** Score your highest-potential accounts. **Day 3:** Add verified hiring signals and prepare outreach. **Day 4:** Use the discovery and job-order qualification tools. **Day 5:** Review your dashboard and choose the highest-value actions for next week.

Important

AI-generated output should always be reviewed for accuracy, relevance and appropriateness before use. The Toolkit is for internal business use by the purchaser and may be customized for your own staffing operation. Redistribution, resale or repackaging of the Toolkit itself is not permitted.
